Values

Who we are

Cerviglas is a Valencia-based company with a rich history spanning over 40 years in the glass manufacturing sector. We specialize in a wide array of glass manufacturing and finishing processes.

We make it happens

At Cerviglas, our core values are rooted in attention to detail, bespoke craftsmanship, and the assurance of exquisite work. Every member of the Cerviglas team embraces and embodies these values, contributing to a collective effort that strives for improvement and evolution each day.

Details

Down to the last detail

Cerviglas approaches projects as unique and tailor-made, maintaining meticulous oversight of each one to provide unparalleled customer service. Every piece of glass is handled with care and transformed with the necessary finishes to contribute to the distinctive value of Cerviglas products.

Any solution you need

Thanks to our extensive machinery and factory, Cerviglas provides every conceivable solution in the market, ensuring that your project becomes exactly as you envision.

CLIMALIT®

Curved Glass

Unique forms

Curved glass is a specialized form of glass that deviates from the conventional flat surface, adding a unique architectural and design dimension to structures. This type of glass is crafted through a controlled heating and cooling process, allowing it to take on graceful curves and bends.

Versatility

The versatility of curved glass makes it an ideal choice for modern and aesthetically pleasing architectural designs. It not only enhances the visual appeal of a space but also contributes to the overall functionality and ambiance.

Possibilities

Whether used in facades, windows, or interior elements, curved glass provides a seamless and elegant solution, allowing designers and architects to explore innovative possibilities in creating dynamic and eye-catching spaces.

Fire-resistant Glass

Fire safety

Fire-resistant glass is a specialized type of glass designed to withstand high temperatures and prevent the spread of flames and smoke during a fire. It is a crucial component in enhancing the safety and security of buildings, particularly in areas where fire protection is a primary concern.

Manufactured using advanced technologies, fire-resistant glass is often composed of multiple layers of glass and interlayers that are specifically engineered to provide fire resistance. In the event of a fire, these layers work together to maintain structural integrity, reduce heat transfer, and act as a barrier against flames and smoke.

Security Glass

Laminated

Laminated safety glass consists of two or more glass panels intimately bonded by interposing one or more layers of polyvinyl butyral (PVB or EVA). The perfect glass-to-PVB adherence is achieved through a thermal and pressure treatment. In the event of glass breakage in a typical installation, the glass fragments remain adhered to the PVB layer(s), keeping the assembly within the frame.

Tempered Glass

Tempered glass undergoes a specialized heat treatment process that imparts exceptional strength and durability. When broken, tempered glass fractures into small, blunt pieces rather than sharp shards, reducing the risk of injury. This type of security glass is particularly suitable for applications where resistance to impact is crucial. Example: SECURIT®

Decorative and Aesthetic Glass

Digital Printing

Technique used for any printing on tempered glass. It allows for the printing of images, designs, shapes, or colors.

Lacquered

Enameled Glass, its opaque and colored appearance is achieved by enameling one of its surfaces, with components of the same nature as glass. Available in both temperable and non-temperable coatings.

Screen Printed

Application of enameling through a screen applied to one side of the glass. Tempered glass.

Decorative Vinyls

Polyvinyl sheets that conform to one side of the glass and can be decorated through digital printing. They can be laminated between two glass layers for enhanced durability

1

Luxurious Chalets

We specialize in double and triple glazing for residences. A testament to our expertise is the multitude of such projects commissioned by our clients.

Explore more projects in luxurious chalets or residences on our website or social media.

CERVIGLAS

Simplemente, lo hacemos posible

Business Buildings

Our expertise extends to the design and implementation of glass solutions that seamlessly integrate with the architectural vision of modern business spaces.

Our projects in corporate buildings exemplify a commitment to both functionality and aesthetics.

An example of that is Scheneider Building in Pamplona

Educational Institutions

From innovative glass partitions that foster collaboration to energy-efficient windows that enhance natural lighting, our projects in educational institutions prioritize the well-being of students and educators. We understand the importance of creating spaces that inspire and facilitate the learning process.

This one is EDEM School building in Valencia.
